Skills

- C# | .NET | Python | JavaScript | TypeScript | Angular | React | NoSQL | SQL | MSSQL | IBM DB2 | Oracle Database | MySQL | TFS | Git
- Amazon Web Services | Cloud Computing | Apache Kafka | CI/CD | Azure DevOps Service | XUnit | Unit Testing | Lambda | OOP | Docker
- Microservices | Asynchronous programming | Frontend | Backend | Full-Stack | English, Portuguese – *All professional proficiency or above*

Experience

Software Engineer **Itaú Unibanco** *Remote, Brazil* **03/2022 - Current**

- Designed and implemented critical microservice applications for banking transactions, ensuring performance and high availability for 28 million financial transactions daily. Leveraged the latest technologies from Amazon Web Services, including **C#, .NET, Python, GitHub Actions, DynamoDB, Apache Kafka, SQS, SNS,** and **Terraform**.
- Architected scalable APIs on **AWS**, utilizing API Gateway, AWS Fargate, and AWS Lambda to support internal systems and various squads. Developed worker services for system optimization using **C#, .NET,** and **Docker**.
- Led initiatives to modernize projects, transitioning from On-Premises to **AWS** infrastructure. Conducted maintenance on legacy code and managed databases to sustain operational efficiency.

Backend Engineer, Contract **BTG Pactual** *Remote, Brazil* **04/2021 - 02/2022**

- Implemented worker services processing millions of financial transactions daily, ensuring alignment with expected standards. Used **C#, .NET, Python, Amazon Web Services, Docker, Azure DevOps Services,** and **MySQL**.
- Developed APIs consuming processed transactions, defining transaction inconsistencies using **.NET** and **MySQL**. These APIs served the Frontend accessed by financial analysis teams.
- Led the creation and maintenance of the Frontend built in **Angular**, aiming to enhance the visualization of processed data and improve the overall user experience.

Software Developer **Educa Mais Brasil** *Remote, Brazil* **08/2020 - 04/2021**

- Developed scalable APIs for integrating with external systems from partner companies to consume student scholarship data. Marketed partner-provided data on our student scholarship platform using **C#, .NET Core, Entity Framework, ASP.NET Web API, Oracle Database,** and **PL/SQL**.
- Maintained APIs with legacy code and implemented new solutions to introduce additional features to existing systems in **C#, .NET Framework**, and **Oracle Database**.Implemented new features in sales administration tools for student scholarships used by sales teams using **Angular**. Enhanced existing sales portals to improve the overall customer experience.

Software Developer **Solutis Tecnologias** *Salvador, BA, BR* **08/2020 - 04/2021**

- Designed and implemented financial data processing APIs for clients in the Water and Sanitation sector in Bahia, Brazil, using technologies such as **C#, .NET,** and **IBM DB2**. Employed best practices and project standards, including Test-Driven Development (**TDD**) and Command Query Responsibility Segregation (**CQRS**).
- Enhanced features within the dashboard for managing indicators, organizing and displaying data processed by the API. Developed interfaces using **JavaScript** and **React**.

IT Assistant **Shopping Piedade** *Salvador, BA, BR* **12/2018 - 08/2019**

- Streamlined administrative processes by developing systems that seamlessly integrate with existing frameworks using technologies like **C#, Microsoft .NET Core, Entity Framework, Microsoft SQL Server,** and **MVC** to optimize the delivery of invoices to customers.
- Orchestrated the administration of the computer network, leveraging Windows Server, to regulate internal user access.
- Headed the support team overseeing the IT infrastructure, ensuring seamless operations and optimal performance.
- Oversaw third-party systems integral to employee workflows, guaranteeing their functionality and actively managed databases utilizing **Microsoft SQL Server**.

IT Assistant, Intern **Shopping Piedade** *Salvador, BA, BR* **04/2017 - 12/2018**

- Contributed to the seamless operation of the IT infrastructure by conducting maintenance, implementing hardware adjustments, and delivering support for existing applications.
- Developed simple applications customized to internal requirements using tools such as **C#, ASP.NET,** and **Microsoft SQL Server**.

Education

Bachelor degree in Computer Engineering **Area 1, Wyden** *Salvador, Bahia, BR* **06/2016 - 06/2022**

Others

- **AWS Certified Cloud Practitioner:** This was one of my initial AWS certifications, affirming a foundational and advanced understanding of services, terminology, and the AWS Cloud. **(10/2022)**
- **AWS Certified Solutions Architect**: The focus of this certification lies in designing solutions optimized for cost and performance, showcasing a deep understanding of the AWS Well-Architected Framework. **(06/2023)**
- **AWS Certified Developer**: Earned through certification proof that proves my proficiency in developing, deploying and troubleshooting cloud-based solutions applications through the use of AWS, adhering to the best practices of the AWS architecture. **(11/2023)**
